

**Therese Log Bergjord**  
**CEO Skretting**  
**Member Nutreco Management Board**

Therese worked in Aquaculture before in the salmon industry where she held various leading positions across the value chain in salmon feed as global sales director for Skretting, in fish farming and fish processing in Pan Fish (Now MOWI).

She started her career in the Oil and Gas industry where she spent 16 years in ConocoPhillips in a number of leadership roles. She studied finance and business administration, and marketing and entrepreneurship at the University of

Stavanger in Norway. Therese has held several executive board positions over the years.

In addition to her role at Skretting, Therese is currently Chairman of the Board of Directors of SeaBOS (Seafood Business for Ocean Stewardship) – a unique collaboration between scientists and leading seafood companies to transform the global seafood industry and promote sustainable production and a healthy ocean.

This work complements Therese’s focus at Skretting and Nutreco. It reflects the business’ priorities of contributing to a resilient planet and ensuring the sustainability of marine ecosystems, while improving the production of high quality food for present and future generations.

*“The biggest challenge we face right now is securing sustainable growth. To ensure that our feed ingredients come from sustainable sources and that the farming conditions for the fish and shrimp are healthy. We need to feed a growing population with a healthy protein and maintain a low carbon footprint. Effectively, we need to do more with less.”*

- Therese Log Bergjord

Therese has honed her extensive knowledge and expertise across three different industries. This experience is used in her current role to develop and execute highly successful strategies across the value chain from feed and nutrition, to salmon farming, salmon sales, and seafood processing.
